Accident Insurance

Accident Medical Expense Benefit

The Plan pays for covered medical expenses starting within 90 days from date of accident causing the injury, we will pay all covered expenses incurred within 3 year from such date, less the deductible (if any) and not to exceed the maximum benefit amounts.

Covered expenses are the usual and customary charges required to be paid for treatment by a physician or dentist, a hospital confinement or outpatient care in a duly licensed hospital, nursing care by a registered graduate nurse, emergency ambulance service and prescribed drugs, medicines and other therapeutic services and supplies. Including Hospital Room and board and Physician's visits.

The Maximum Payable Accident Medical Expense for covered Youth Activities (Ages 18 and Under) is \$250,000 with no deductible.

The Maximum Payable Accident Medical Expense for covered Adult Activities (Ages 19 and Over) is \$100,000. The Deductible applicable for covered Adult Activities is \$500.00.

Excess Provision

The Accident Medical is payable in excess of all other valid and collectable group insurance (Examples: Major Medical Plans, Automobile Medical Policies and HMO Plans).

Accidental Death and Specific Loss Benefit

If a covered injury causes the death or loss of sight or limbs of the insured person, a benefit will be paid upon receipt of due proof that:

1. The insured has sustained a loss of the type listed below within 1 year after suffering the injury and
2. Such loss resulted directly and independently of all other causes from such injury.

Loss of a hand or foot is actual severance through or above the wrist or ankle joint. Loss of an eye is the entire and irrevocable loss of sight of the eye. The total benefits payable under this coverage to one insured who suffers more than one such loss from one accident shall not exceed \$25,000. The amount paid under this benefit will be less any amount paid under the Paralysis Benefit.

If more than one loss occurs from one accident only one amount, the larger, will be paid. The amount paid under this benefit will be less any amount paid under the Accidental Death and Specific Loss Benefit for the same injury.

Aggregate Limit

The benefit for Accidental Death and Specific Loss is limited to an aggregate amount of \$500,000. This is the maximum amount the plan will pay for injuries to a group of insured persons as the result of the same covered accident. Benefits will be divided among the insured persons in proportion to the actual loss incurred.

Who is Insured

Try-Out Season: During early preseason tryouts, insurance will extend to every person engaging in practice sessions or games.

Playing Season: After the start of the playing season, insurance will cover all persons whose names are registered as eligible team members with the insured League or Conference. In addition to registered players, the plan will cover the coaches, trainers, managers, volunteers, volunteer umpires, referees and hired officials while acting in their official capacities at scheduled games or practice sessions. Coverage is effective both during the pre-season and regular playing season.

When are they covered?

The Plan provides coverage while:

1. Participating in scheduled games and practice sessions for youth activities (must be supervised by NRPA league/conference/association or an adult member of that league/conference/association)
2. Participating in occasional fund raising events
3. Traveling in a group directly to or from a scheduled game or practice session that is directly supervised by the Plan Sponsor or one of its member organizations.

Subject: TPRD 11- Resolution from Council

Kandace,

Per the TPCG oversight ordinance shown below, TPRD 11 requests separate resolutions approving seeking quotes/bids for the following items:

- Quotes/bids for materials and labor for playground equipment for the Wright Ave Park
- Quotes/bids for materials and labor to pour cement and install pour-n-play fall protection at the Wright Ave and Voisin Parks, not to exceed \$60,000
- Quotes/bids for materials and labor install shades over new playground equipment installed in 3 parks, not to exceed \$25,000
- Quotes/bids for materials and labor to install swing sets and loose fill fall protection in borders at Mahler and Dumas Parks, not to exceed \$5,000 per park
- Quotes/bids for materials and labor to renovate the basketball court behind W. Houma Gym, not to exceed \$7,000

Additionally, due to our use of bill.com and the improved review oversight exercised by your office, as well as the current development of a 5-year capital improvement plan (which will help the district plan projects and determine what can be afforded and when), I would like to humbly request consideration by the council to relieve TPRD 11 of the requirement to seek resolutions prior to moving forward with projects, as this process certainly slows down progress. We request this consideration be given upon the successful adoption of a 5-year plan currently in the works, and expected to be adopted in the next 3 months. The council will still maintain oversight via your invoice approval and requirement to use parish purchasing. The requirement to seek resolutions requires the board to revisit each issue in a subsequent meeting after receiving the resolution, and ultimately slows down progress on average by a month for each project. Additionally, the council has already authorized the funding of the capital improvement via budget approval, and therefore is a duplication of funding approvals.

Please forward the approved resolutions to Scott Jenkins and Renee Bourg.

Thanks,

Scott Jenkins

Subject: TPRD 11- Resolution from Council

Kandace,

Per the TPCG oversight ordinance shown below, TPRD 11 requests separate resolutions approving seeking quotes/bids for the following items:

- Quotes/bids for materials and labor for playground equipment for the Wright Ave Park
- Quotes/bids for materials and labor to pour cement and install pour-n-play fall protection at the Wright Ave and Voisin Parks, not to exceed \$60,000
- Quotes/bids for materials and labor install shades over new playground equipment installed in 3 parks, not to exceed \$25,000
- Quotes/bids for materials and labor to install swing sets and loose fill fall protection in borders at Mahler and Dumas Parks, not to exceed \$5,000 per park
- Quotes/bids for materials and labor to renovate the basketball court behind W. Houma Gym, not to exceed \$7,000

Additionally, due to our use of bill.com and the improved review oversight exercised by your office, as well as the current development of a 5-year capital improvement plan (which will help the district plan projects and determine what can be afforded and when), I would like to humbly request consideration by the council to relieve TPRD 11 of the requirement to seek resolutions prior to moving forward with projects, as this process certainly slows down progress. We request this consideration be given upon the successful adoption of a 5-year plan currently in the works, and expected to be adopted in the next 3 months. The council will still maintain oversight via your invoice approval and requirement to use parish purchasing. The requirement to seek resolutions requires the board to revisit each issue in a subsequent meeting after receiving the resolution, and ultimately slows down progress on average by a month for each project. Additionally, the council has already authorized the funding of the capital improvement via budget approval, and therefore is a duplication of funding approvals.

Please forward the approved resolutions to Scott Jenkins and Renee Bourg.

Thanks,

Scott Jenkins

Greetings,

It wasn't that we are getting more money, but that we are allowed to spend the money on engineering rather than all on construction. This is the amendment to the CEA that we received in November. I thought that you received a copy.

The state is still in the process of approving this split between engineering and construction, so we don't have a revised contract yet, but have committed to this total share. I cc'd Mart to be sure that we are still in agreement on the numbers. There is more Go Mesa funding available, and in fact the Living Mitigation project north of Lake Boudreaux has \$15,000 in permit fees due that this might be relevant to.

Thank you.
Cheers,
Jennifer

We have some general fund money in the Atchafalaya Long Dist Sediment project (659-301-8941-06). If no one is aware of using this money for something else we could take the \$87,744 from this project.

I am not aware of any available CIAP money, unless the state has allocated some to the Oyster Bed project. It was and is my understanding that all the CIAP money had to be expended/committed by the end of 2016. There is a small amount of GOMESA money in the neighborhood of what you show below. I have agreed to allow all this to be used for the Oyster Bed project, which is an eligible project under GOMESA. I would be surprised if we are using CIAP funds for the Falgout Canal Marsh Management Monitoring contract with Delta Coast, since I do not think this funding source is available any longer.

Okay so we can't use the money for the Oyster Bed Protection System, so we need to determine where else this money can come from.

When Jennifer and I discussed the Oyster Bed project some months ago it was discussed that we would use some CIAP money, is this somewhere else other than the Falgout Canal Marsh Management? We are also using some GoMesa money, but there is only about \$35,000 of that money available. We need a total of about 105,000.

I will look to see if there is any money available elsewhere and please let me know if you have any ideas.

Kandace,

I don't know who told you there would be no other invoices for the Falgout Canal Marsh Management Project, but we are REQUIRED by the United State Army Corps of Engineers to monitor this project for five years. We are under contract with Delta Coast for this monitoring and there has been no termination of their contract that I am aware of. I also believe that Mart may have authorized Delta Coast to open one of the gates for a fisher/shrimperman so there may be additional funding that is needed for the Falgout Canal Marsh Management Project in the future.

Yes, we will be getting more invoices for this project until the contract fees are exhausted. I have attached the recorded contract and a summary of expenses that mirror the contract for your use.

Please see attached invoice for Delta Coast to the Falgout Canal Marsh Management Project (659-301-8411-03). Back in October I was told that this money could be used for the Oyster Bed Surge Protection System, and that there would be no other invoices charged to the Falgout Canal Marsh Management project, but this attached invoice has hit the ledger.

Will we be getting more invoices for this project? If so we need to find the \$87,664 from another project for the Oyster Bed.

Thanks
Kandace

Dear Mr. Waskom:

This letter provides official notification that the U.S. Department of Homeland Security's Federal Emergency Management Agency (FEMA) approves additional Phase I engineering fees and funding of Phase II for the application submitted by Terrebonne Parish for the Bonanza Pump Station Infrastructure Improvement project. Federal funding for the project, in the amount of \$487,043.00 is available through the Hazard Mitigation Grant Program (HMGP) under FEMA 1792 DR-LA. The following is the approved Scope of Work (SOW) for the above-referenced project: To provide additional flood protection to the Bonanza Pump Station by increasing the elevation of the bulkhead at the pump station. The proposed elevation of the new bulkhead is +10.0' NAVD88 elevation. The existing timber bulkhead and sheet piles will be replaced by steel sheet pile. Tide flex Check valves will also be installed on the discharge pipes to prevent the backflow of water through the discharge pipes. Cyclone fencing will be installed around the pump station and two sheds will be relocated on the property to allow for access to the pump stations.

This project has been determined to be Categorically Excluded (CATEX) in accordance with FEMA Instruction 108-1-1 and DHS Instruction 023-01-001-01; CATEX N7 from the need to prepare either an Environmental Impact Statement or Environmental Assessment. No extraordinary circumstances in accordance with Department of Homeland Security (DHS) Instruction 023-01-001-01 have been identified regarding this action. The applicant must comply with all conditions set forth in the attached Record of Environmental Consideration (REC). Failure to comply with these conditions may jeopardize federal assistance including funding. Refer to CATEX/EA for verbiage and outline any conditions or deliverables.

The milestones included in the application indicate that the time to complete this sub-award will be 36 months from the date of this letter. FEMA will not establish activity completion timeframes for individual sub awards. The Period of Performance (POP) for DR-1792 is December 31, 2020, 36-months from the close of the application period. It is the responsibility of the Recipient and sub-recipient to ensure all approved activities associated with this sub-award are completed by the end of the POP. Any costs incurred prior to the date of this approval or after the POP will be disallowed.

A change to the approved Scope of Work (SOW) requires prior approval from FEMA. The National Environmental Policy Act (NEPA) stipulates that additions or amendments to a HMGP SOW shall be reviewed by all state and federal agencies participating in the NEPA process. NEPA sign-off for all SOW additions or amendments is essential before the revised SOW can be approved by FEMA or implemented by the HMGP sub-recipient.

The initial quarterly progress report for the HMGP project is due at the end of the approving quarter. Please include this HMGP project in your future quarterly reports. Note that 44 CFR 206.438(c) indicates the State must provide a quarterly progress report to FEMA indicating the status and completion date for each project funded. The report will include any problems or circumstances affecting completion dates, SOW, or project cost that may result in non-compliance with the approved grant conditions.

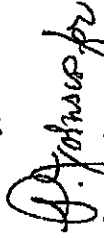

In accordance with HMGP rules and policy, we require the submittal of all closeout documentation within 90-days of the project completion not to exceed POP. Section 206.438(d) of 44 CFR requires the Governors Authorized Representative (GAR) to "certify that reported costs were incurred in the performance of eligible work, that the approved work was completed and that the mitigation measure is in compliance with the provisions of the FEMA-State agreement."

The Obligation Report and REC are included for your records.

Project Name/Number: HMGP DR-1792-LA, Project #14, Bonanza Pump Station Infrastructure Improvement Project

Project Location: 237 Shady Oak Court, (29.63041; -90.75965), Houma, Terrebonne Parish, Louisiana.

Project Description: The proposed mitigation project is to provide additional flood protection to the Bonanza Pump Station by increasing the elevation of the bulkhead at the pump station. This will prevent flood waters from entering the forced drainage system at the pump station location. The pump station houses one 36" vertical lift pump and three 48" vertical lift pumps. All pumps are driven by diesel engines. Currently, the pump station is protected from flooding by a bulkhead constructed to an approximate elevation of +8.0' NA VD88. The proposed elevation of the new bulkhead is +10.0' NA VD88. The existing timber bulkhead and timber piles will be replaced by steel sheet pile. The sheet pile would extend the same distance on both sides of the pump station. The sheet piles would tie in properly to the pump station on both sides to prevent seepage. Tide flex check valves will also be installed on all discharge pipes to prevent backflow. Dredged materials resulting from the installation of the sheet piles will be temporarily stored on site on a field (29.63009; -90.75976). Cyclone fencing will be installed around the pump station. Two sheds will be relocated on the same property just north of the project to allow for access to the pump stations.

IV. Extraordinary Circumstances

Based on the review of compliance with other environmental laws and Executive Orders, and in consideration of other environmental factors, review the project for extraordinary circumstances.

* A "Yes" under any circumstance may require an Environmental Assessment (EA). If the circumstance can be mitigated, please explain in comments. If no, leave blank.

Yes

- ☐ (i) A potentially significant effect on public health or safety.
- ☐ (ii) A potentially significant effect on species or habitats protected by the ESA, Marine Mammal Protection Act, Migratory Bird Treaty Act, Magnuson-Stevens Fishery Conservation and Management Act, or other law protecting a species or habitat.
- ☐ (iii) A potentially significant effect on historic properties (e.g., districts, sites, buildings, structures, or objects) that are listed in or eligible for listing in the National Register of Historic Places, affects traditional cultural properties or sacred sites, or leads to the loss or destruction of a significant scientific, cultural, or historical resource.
- ☐ (iv) A potentially significant effect on an environmentally sensitive area.
- ☐ (v) A potential or threatened violation of a Federal, State, or local law or requirement imposed to protect the environment. Some examples of other requirements to consider are: a local noise control ordinance; the requirement to conform to an applicable State Implementation Plan for air quality standards; Federal, Tribal, State, or local requirements to control hazardous or toxic substances; and environmental permits.
- ☐ (vi) An effect on the quality of the human environment that is likely to be highly controversial in terms of scientific validity, likely to be highly uncertain, or likely to involve unique or unknown environmental risks. This also includes effects that may result from the use of new technology or unproven technology. Controversy over, including public opposition to, a proposed action absent any demonstrable potential for significant environmental impacts does not itself constitute an extraordinary circumstance.
- ☐ (vii) Extent to which a precedent is established for future actions with significant effects.
- ☐ (viii) Significantly greater scope or size than normally experienced for this particular category of action.
- ☐ (ix) Potential for significant degradation of already existing poor environmental conditions. Also, initiation of a potentially significant environmental degrading influence, activity, or effect in areas not already significantly modified from their natural condition.
