The Opioid Epidemic

Government Opioid Costs Recovery Program

In 2015, over 300 million prescriptions were written for opioids, which is more than enough to give every American adult their own bottle of pills.¹

- **Hydrocodone (e.g., Vicodin)**
- **Oxycodone (e.g., OxyContin)**
- **Oxymorphone (e.g., Opana)**
- **Methadone (especially when prescribed for pain)**

The Opioid Epidemic

Government Opioid Costs Recovery Program

- Opioids have claimed 175,000 lives from 1999-2013.
- In 2013 alone, 16,235 deaths attributed to opioid overdoses.
- From 1999 to 2010, a 4-fold increase in opioid sales paralleled a more than 4-fold increase in prescription opioid overdose deaths.

The Opioid Epidemic

Costs of the Opioid Epidemic

- In the United States, prescription opioid abuse costs are about **\$55.7 billion annually¹**

Of this amount:

- 46% is attributable to workplace costs (e.g., lost productivity): **\$26 Billion**
- 45% to healthcare costs (e.g., abuse treatment): **\$25 Billion**
- 9% to criminal justice costs: **\$5 Billion**

Over Prescription of Opioids a 'Fundamental Cause'

**NAPOLI

ATTORNEYS AT LAW

Government Opioid Costs Recovery Program

- ◇ Opioid prescriptions rose 104% from 2000 to 2010¹
- ◇ 300 million prescriptions for opioids were written in 2015 alone
 - ◇ More than one for every US adult
- ◇ Surge in prescriptions may be traced back to undertreatment of chronic pain in the 1980s and 1990s
- ◇ Many prominent physicians urged usage of opioids for pain – some stating that the risk of misuse and addiction was low
- ◇ 1995 – Purdue Pharma received FDA approval for extended release OxyContin
- ◇ Intensive marketing and limited policing of fraudulent activity leads to 'blockbuster' success for Purdue, OxyContin and other major opioids

"Purdue's success was attributable in part to low patenting standards that enabled the company to secure and extend market exclusivity for extended-release oxycodone, providing motivation for its aggressive marketing.

*A history of tepid enforcement against pharmaceutical companies engaging in illegal marketing further incentivized Purdue to make false claims about the safety and effectiveness of the drug. Both practices helped drive opioid overuse and misuse, with tragic public health consequences."**

- ◇ State, County and City programs to help individuals battling opioid abuse are needed, but can also further enable the opioid epidemic
- ◇ First responders, law enforcement or others are being trained how to administer Buprenorphine/Naloxone (Narcan), the lifesaving antidote which is used to block the effects of opioids, especially in overdose
- ◇ The increasing demand Narcan has led to pharmaceutical companies drastically increasing the price
- ◇ Taxpayer funds are used to pay for Narcan, while both prices and pharmaceutical profits are sharply on the rise

Between 2005 - 2015 pharmaceutical companies have drastically increased prices for naloxone products. Prices continue to rise today.

HOUMA, LOUISIANA 70361

REQUEST FORM FOR CO-SPONSORSHIP

ALL REQUESTS MUST BE RECEIVED 30 DAYS PRIOR TO THE DATE OF EVENT

The constitutional norm for the lawful use of public funds and property is found in the Louisiana Constitution, Article VII, Section 14 (1974). Paragraph (A) generally prohibits the loan, pledge or donation of property, or things of value of the state or of any political subdivision.

Exceptions to the above prohibition are found within paragraph (B) and include "the use of programs of social welfare for the aid and support of the needy."

Paragraph (C) authorizes the state and its political subdivisions to engage in cooperative endeavor with other government agencies, public or private corporations, or individuals. However, if a cooperative endeavor for a public purpose is violated whenever a political subdivision seeks to give value in the absence of a legal obligation to do so. Furthermore, any such contemplated use of property must also create a public benefit proportionate to its cost.

Accordingly, the Terrebonne Parish Consolidated Government (TPCG) has established the policy of co-sponsorship of events may be authorized by the Council, within budget, for the following situations:

- (i) The EVENT serves a public purpose for the expenditure or transfer that could not be accomplished by the governmental purpose the public entity has legal authority to pursue; and
- (ii) that the expenditure or transfer, taken as a whole, does not appear to be greater than the value of the public purpose served;
- (iii) that the public entity has a demonstrable, objective, and reasonable expectation of receiving at least equivalent value in exchange for the expenditure or transfer of public funds.
